Ceiling stay location will be as per illustration unless otherwise requested.

25mm **Stainless Steel**

- Curtain Rails are modular and are joined using black connectors to aid delivery and installation. They can be manufactured as a single piece and to customer specification on request.
- Ceiling stays are recommended for rails used in shower scenarios due to the additional weight of a wet curtain. These are fitted during manufacture and cannot be added later.
- Ceiling Stays are 500mm long as standard and can be cut to length on site. Longer stays can be manufactured on request.
- Fixing holes to fit size 8 screws. (Fixings not supplied)
